

The role of industry and research organisations

Alain Marti
EDF R&D

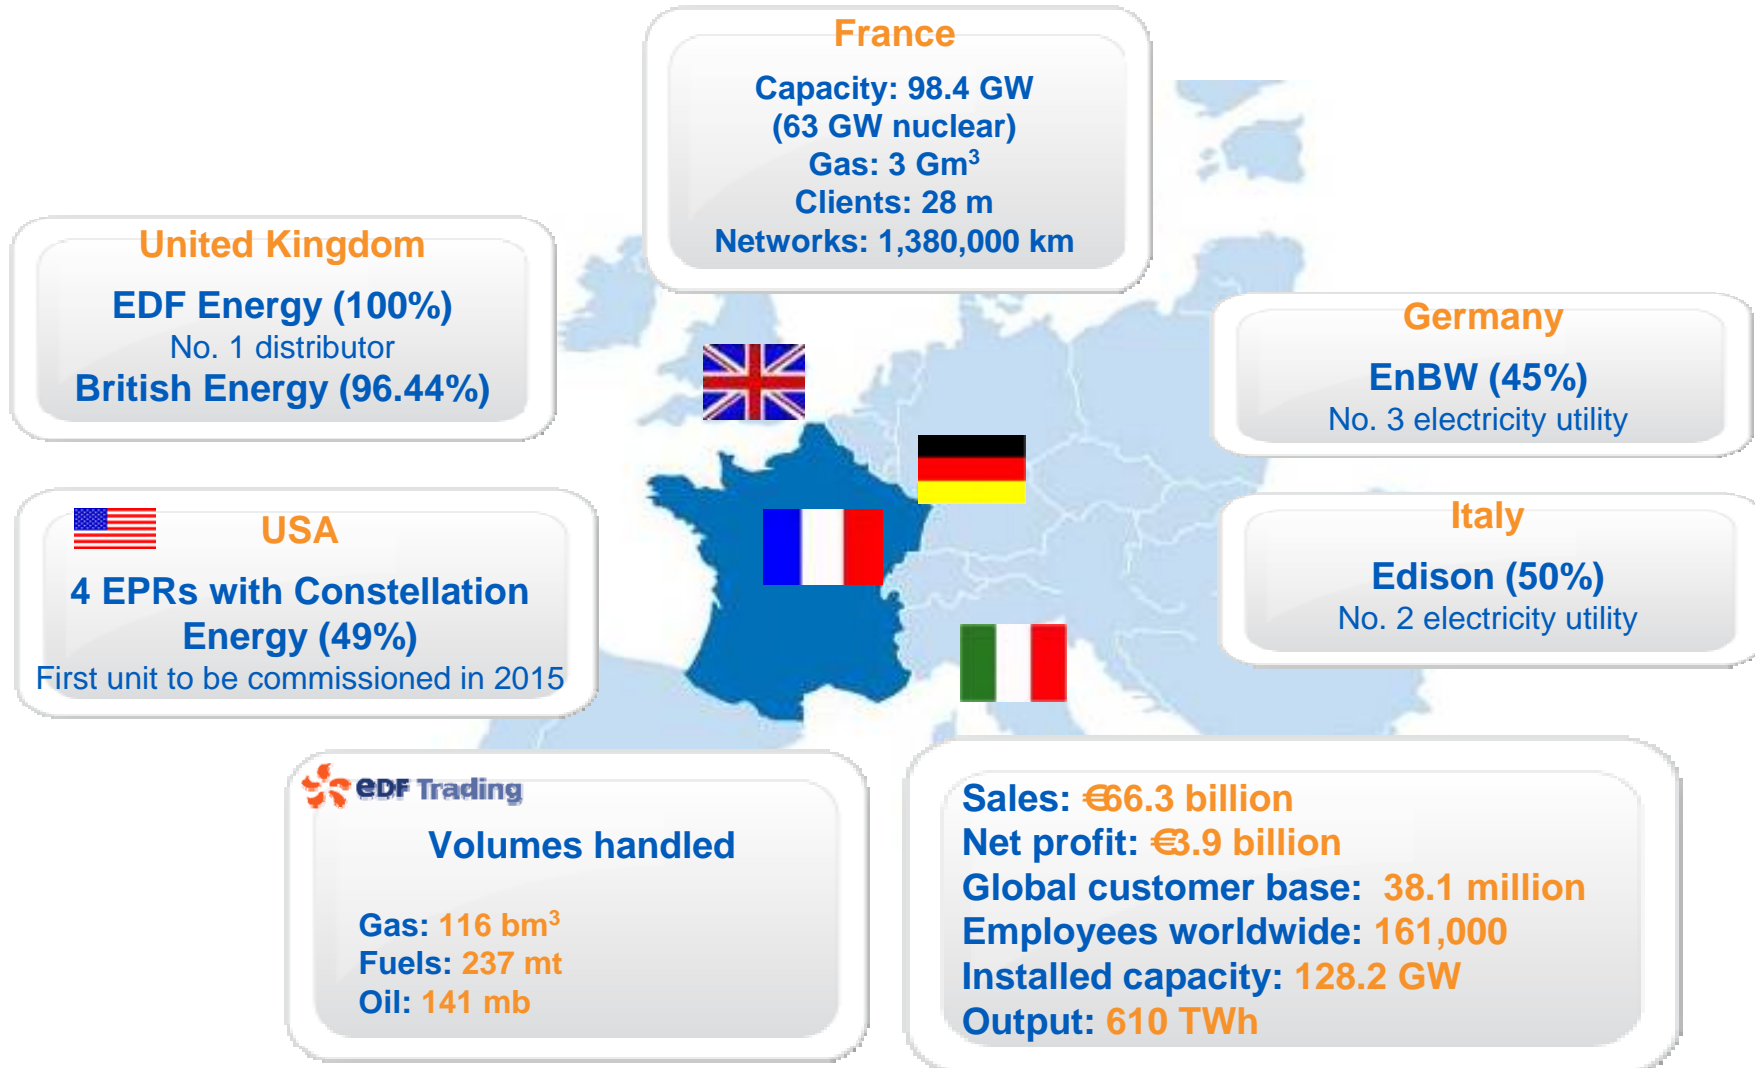

IV Conference on the FP7 in Spain
The European RTD Framework Programmes:
From Economic Recovery to Sustainability
13-14 April 2010 / Valencia - Spain

eu 2010.05 

12 13 14 15 16
FP7: European Innovation and RTD Transforming Sectors Week

The EDF Group

EDF's vision for the future

1 – Fighting against the climate change

2 – Facing a lack of energy

3 – What to do ?

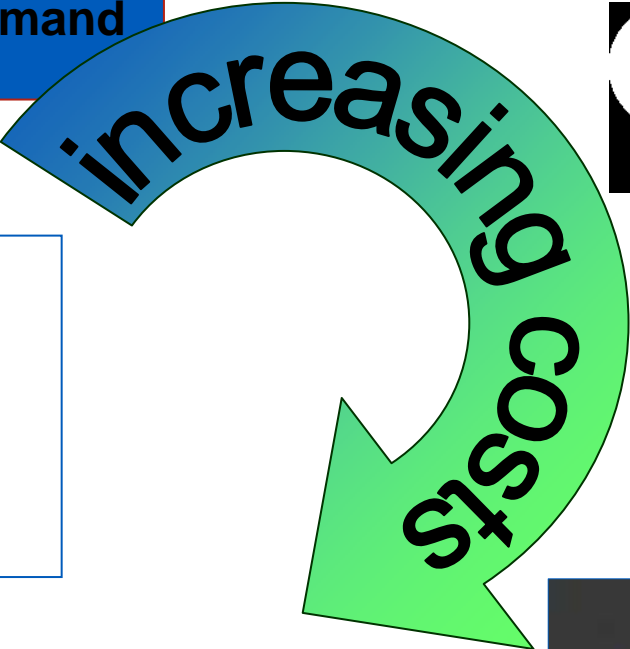

3 – Targeting the buildings

Three steps towards Energy Efficiency in Buildings

1 – Reduce energy demand

The main issue for Europe in buildings : **Energy Efficiency for existing and new Buildings**

2 – Use high efficient systems and control

3 – Use local renewables

The role of industry and research organisations

1 – Need of cooperation

→ an example from EDF's experience

2 – Main barriers

a approach which is both

→ systemic

→ collaborative

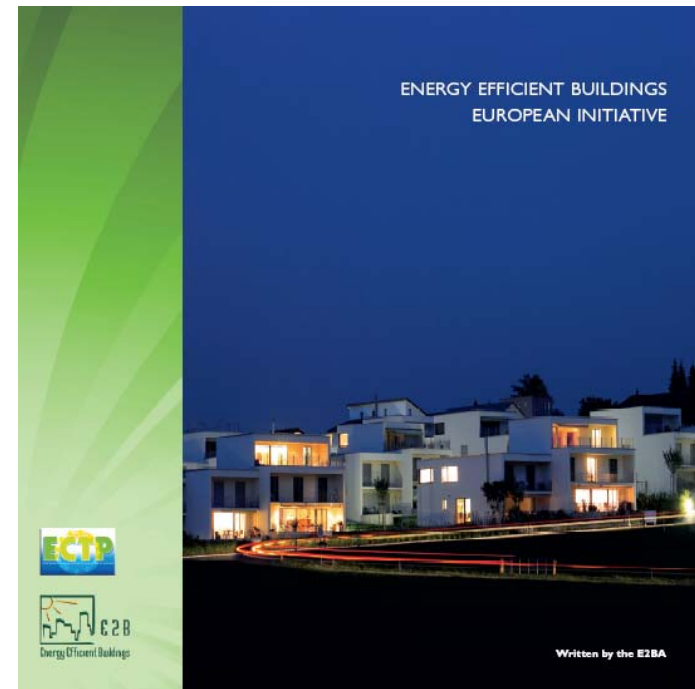

3 – Need of long term and stable research program

→ a key factor for a great change

The role of industry and research organisations

4 – The PPP instrument

- the challenges
- the management
- simplicity
- on the good path

***Industry and research organisations
are ready for further cooperation !***

Thank you !
